SCOPE

These proceedings contain the papers of the 9th IADIS International Conference Information Systems 2016, which was organised by the International Association for Development of the Information Society in Vilamoura, Algarve, Portugal, 9 - 11 April 2016. The IADIS Information Systems Conference 2016 aims to provide a forum for the discussion of IS taking a socio-technological perspective. It aims to address the issues related to design, development and use of IS in organisations from a socio-technological perspective, as well as to discuss IS professional practice, research and teaching. A set of key areas has been identified. However, these do not aim at being prescriptive, or set in stone, and any innovative contributions that do not fit into these areas have also been considered. The following main tracks have been object of paper submissions: - IS in Practice, Technology Infrastructures and Organisational Processes - IS Design, Development and Management Issues and Methodologies - IS Professional Issues - IS Research - IS Learning and Teaching.

The users of Scimago Journal & Country Rank have the possibility to dialogue through comments linked to a specific journal. The purpose is to have a forum in which general doubts about the processes of publication in the journal, experiences and other issues derived from the publication of papers are resolved. For topics on particular articles, maintain the dialogue through the usual channels with your editor.
